

“CHICKEN-SPECIAL”: Set up Chicken Special in Deuce from Inside-Outside. At the command of the Caller, the Left Column (even numbered GL’s) Flair Out behind GL 2 and head for the opposite end of the field as GL 1 and odd numbered GL’s continue on. At the command of the Caller, both groups will make a single file turn back and head toward each other on opposite sides of the centerline. There is no execute command so each rider needs to know which GL they turn on or in front of. (i.e. GL 1 turns sharply to the LEFT when his saddle back is even with GL 6’s and in front of GL 8 (with 8 bike team on the field). ALL GL’s turn to the LEFT at the same time and move to the ‘curb’ at a 45 degree angle, all straightening up on the curb simultaneously and continue down field in opposite directions. At the Callers commander, “TURN BACK NOW” all GL’s make a half circle to the RIGHT, crossing the centerline and again, both columns head toward each other. No execute command will be given, but each rider will turn IN FRONT OF THE SAME person as they did with the first Chicken but turning toward the RIGHT on the second maneuver. Again, all GL’s head down field in their direction of travel until the Caller commands “Turn back Now” and again, all GL’s turn toward and cross over the centerline and the 2 columns head toward each other. As the front wheels of the ‘turning partners’ are side by side all GL’s perform a Right Simultaneous Circle matching front wheels at the centerline a the completion of the circle, then continue down field in the columns direction of travel.

The Caller will command “Single File Turning Back Now” The callers group or Group 1 will turn back to the centerline. The 2nd group will stay to the curb. The caller will then call “Group 2, Re-Join” and the second column will perform a “Turn to Deuce on the Centerline” maneuver and from Deuce go into an Inside-Outside and continue with the next maneuver.

NOTE: It is MUCH harder to watch, or describe than it is to perform!
